

Handmade Ceramic Mirrors

'Elissi'

"colombino" technique

"palline" technique

design: Carlo Guazzo

External measures 48xH67 cm

Internal measures 33xH52 cm

Weight 6 kg

Handmade elliptical shaped mirrors made of "terra refrattaria" [sand and clay mixture]; crafted one by one using a MDF [Medium Density Fibreboard] cast; they are let dry naturally for about one week (sight controlled by the craftsman). They are subject to a first furnace treatment at a temperature of 1100°C (biscuit).

Afterwards, they are glazed both by immersion and spray then subject to a second furnace treatment still at a temperature of 1100°C. Each piece is hence hand decorated with a 12% gold or platinum liquid and then subject to a third furnace treatment at a temperature of 800°C.
