Round wengé wood stool, maple legs and calf snake printed coating motherpearl colour

Footrest

When you come home in the evening and the dogs won't move from the carpet and you have to get over them and the children scream and dinner is not yet ready and the sofa is free although it has just been cleaned so you can't make yourself comfortable on it and the wife is waiting for you because the boiler is broken and the neighbours are troublesome „, where do you put your feet? On your "Babà", of course!

A three or five legged object of extreme simplicity, wood structure (cherry, rosewood, maple, wengé) made through bending. The visual pleasure of wood continuity is rendered through a special procedure. The round part of the structure is made of shearing of various wooden essences heat-glued together with a uric base adhesive; the whole is then shaped into a metal league cast with a heat-oil press procedure. The material is then cut out by a number control machine.

The coat is genuine leather, handcrafted and pleated in various colour and trims. It goes with everything and may be used as a stool.
